

Stanford University Waste Management Services RFP Addendum 5

The purpose of this document is to provide updates to Stanford University's Request for Proposals (RFP) for Waste Management Services, posted on November 19, 2021.

RFP Section 1.3, Background, shall be amended by this Addendum 5 to add the following subsection:

"1.3.4 On-Site Operations

Stanford strives to have a collaborative relationship with the selected Proposer. Stanford has convened an on-going working group across internal stakeholders to assess opportunities for limited on-site operations related to this RFP that best align with Stanford's overall mission and priorities.

Stanford has secured the ability, at its sole discretion, to offer the selected Proposer conditional and limited space in the Stanford Service Area. Such access, if granted, would require the selected Proposer to vacate the space upon notice by Stanford, through an agreed upon process, cost, and timeframe. The current operations yard that PSSI operates out of at Stanford, as described in this RFP, will still be decommissioned prior to the commencement of services from the selected Proposer. The selected Proposer will still not have the ability to conduct most operations on-site for any period of the term of the Draft Agreement; operations that will not be permitted on-site include but are not limited to a transfer station, vehicle fueling, fleet parking, and vehicle maintenance.

Stanford plans to discuss Proposers' possible uses of limited on-site space during the interview process for this RFP. This will include inquiries regarding how limited on-site operations can provide cost savings to Stanford, as well as provide other benefits to Stanford.

Please note that Stanford is not extending the proposal deadline for the Waste Management Services RFP beyond the prior March 1, 2022 deadline stated in the RFP, and is not requiring additional information be provided by proposers in the March 1, 2022 submission. Stanford is also not opening a new question and answer period for prospective proposers.
